- API Integration

## INTRODUCTION

Hello, I am a dynamic and motivated Flutter developer, Skilled in building responsive, user-friendly mobile applications using Flutter. Proven ability to manage multiple tasks, and solve real-world problems through clean and efficient code. Proficient in Flutter, Dart, API Integration and UI/UX. Now actively seeking a full-time opportunity to apply and expand my development skills in a professional setting. Committed to continuous learning and growth in the tech industry.

## PROJECTS

### Quill AI

- Created a Flutter app enabling users to upload PDFs and ask questions about the content.
- Utilized Gemini AI to provide accurate answers.
- Designed a user-friendly interface for seamless PDF upload and intuitive querying, showcasing expertise in Flutter development and AI integration.

### Burger Shop

- A simple yet functional mobile application developed using Flutter to simulate a burger shop experience.
- The app includes multiple pages such as Home, Menu, Item Description, and Cart.
- Users can browse items, view detailed descriptions, add products to their cart, and place orders.

### Tik Tac Toe Game

- A classic two-player Tic-Tac-Toe game built using Flutter, focused on practicing UI layout and game logic implementation.
- The app features a clean and responsive interface, with real-time game state updates and win/draw detection.
- Developed as a learning project to strengthen foundational Flutter concepts such as widget tree management, state handling, and user interaction.

## EDUCATION

**BS in Computer Science** 2021-2025  
National University of Modern Languages
